

Quality Policy

It is the established Quality Policy of Copperchase Limited to provide its Customers with Products and Services that are fit for their intended purpose, delivered in accordance with the contract timescales, and in conformity with the Company's quality specifications.

The Policy covers every aspect of the Company's business, and all of its employees. The purpose of the Quality Manual is to describe how the Policy is put into effect, to give instructions and guidance to the employees where their actions can affect product quality, and to provide a picture of the overall quality activity within the Company.

The Company's Quality Manual shows how the company plans for Quality in all aspects of its business, and reviews these plans based on evidence gained during reviews of the system. Copperchase are committed to continuous improvement of the quality management system and of our products and services.

Copperchase recognises that all employees affect, in some way, the Quality of our Products and Services. Co-operation is needed to meet our Quality Objectives:

-  To provide the Customer with a tested and documented system that meets the agreed requirements.
-  To provide equipment that is reliable in operation and which can be maintained and supported.
-  To follow documented procedures and instructions in order to achieve consistent quality.
-  To review documented procedures and instructions in order to improve the Quality system for the benefit of the Company.
